EXPLANATION OF WATER REUSE PERMIT

Effective Date of Permit and Expiration Date

Leave blank. To be filled out by ISD employee.

Name of User

This is the name of the person(s), company or entity that owns the property on which the recycled water will be used.

User's Agent

This is the name of any representative designated by the User to handle water pick-up. If the User will pick up the water, leave this section blank.

Method of Water Distribution

If "Other" is checked, write in the intended method of distribution and attach additional information if needed.

Application Method and Use of Water

Check all that apply.

Volume of Recycled Water

This is the estimate, in gallons, of the amount of recycled water to be used on the property.

Signage Required

Leave Blank. To be filled out by ISD employee.

Where Applied

Provide Address, City and County in which the recycled water will be used. Include the expected date you plan to start using the recycled water.

Signature of Producer/Distributor

Leave Blank. To be filled out by ISD employee.

Signature of User

Signature of "User" named on permit form.

Signature of User's Agent

Signature of "User's Agent" named on permit form, if applicable.

GUIDELINES FOR WORKER PROTECTION
(State of California Department of Health Services Guidelines)

- A. Workers should be informed that although reclaimed water has been treated to lower health risks, bacterial and viral contamination is still present and potentially may cause illness or infection. Contact with reclaimed water by ingestion, inhalation of mist, or on cuts or abrasions should be avoided, and the precautionary measures listed below should be carefully reviewed and followed.
- B. Precautionary measures should be taken to minimize worker contact with constituents of reclaimed water.
 - 1. Workers should not be subjected to reclaimed water sprays, mists, or aerosols.
 - 2. Workers should be protected with protective clothing when there will be more than casual contact with the reclaimed water.
- C. Safe drinking water should be supplied for workers. Where bottled water is provided, the water should be in contamination-proof containers and protected from reclaimed water and dust.
- D. Hand washing facilities should be provided consisting of potable water supply, hand washing soap, and single use sanitary paper towels. The importance of hand washing should be stressed when working with reclaimed water, especially before eating or smoking.
- E. Workers should not apply reclaimed water by hand held nozzles or other hand held devices that can produce sprays, mists, or aerosols.
- F. Precautions should be taken to avoid contamination of food taken into reclaimed water use areas. Food should not be taken into areas still wet with reclaimed water.
- G. Workers should be notified that reclaimed water is in use. Notification should include the posting of conspicuous warning signs with proper wording of sufficient size to be clearly read. In those locations where English is not the primary language of the workers, the signs should be in the appropriate language as well as in English.
- H. An adequate first aid kit should be available on location. Cuts or abrasions should be promptly washed, disinfected, and bandaged.
- I. Public contact with reclaimed water shall be avoided, to the extent practical, under the normal use at the reclaimed water site.
- J. In all areas where recycled water is used that are accessible to the public, warning signs shall be installed at adequate intervals around the use area as required by the District.
- K. Recycled water shall not be applied where it could contact walkways, passing vehicles, buildings, drinking water facilities, storm drains, or enter areas where food is handled or eaten.
- L. Adequate measures shall be taken to prevent ponding, and to prevent run off of recycled water from the authorized recycled water use area unless it is specifically allowed by the RWQCB or an attachment to this Permit.
- M. Spray of recycled water shall not be allowed to contact an external drinking water fountain.
- N. There shall be no irrigation or impoundment of recycled water within a minimum of 50 feet of any water well.
- O. Distributor's vehicles used for transportation and distribution of recycled water must have water tight valves and fittings, and must not leak, and tanks must be cleaned of contaminants prior to use. A truck or tank that has contained material from a septic tank or cesspool shall not be used to convey recycled water.
- P. All recycled water use be confined to designated area of use and around the construction site at 300-ft interval advising general public of recycled water use,
- Q. Distributor's vehicles that convey recycled water shall be clearly labeled in a prominent location with language stating in English "Recycled Water, (Reclaimed Water) Do Not Drink".
- R. Recycled water shall not be put into piping or a storage facility without specific written authorization from ISD.
- S. Recycled Water Reuse Permit annual fee to be paid by contractor: \$125, plus \$10 per truckload of recycled water drawn by contractor.

I HAVE READ AND UNDERSTOOD THESE GUIDELINES.
